

King Kong at Mont Parnes

Regency Casino Mont Parnes (RCMP) asked Gaming Support to make an iconic sign for its King Kong Cash (KKC) progressive. In fact RCMP management asked that they make an **extraordinary** sign; a sign that would capture the attention of players using special effects. RCMP was looking for an exceptional sign to complement this new slot bank.

Gaming Support certainly believe that they have delivered this; a truly exceptional casino sign. It is fully animated and audio synched, and integrates with the slot to keep players entertained:

Idle: if the KKC slots have been empty for a little time, there's an idle show to say to players "Over here";

Attract: if no one has played a KKC slot for a long time, there's an attract show to get people's attention;

Jackpot: if someone hits a jackpot...well, stand back and be amazed. You can see this amazing show for yourself by watching the video on our digital September 2009 front cover of Casino Life. (www.casinolifemagazine.com)

Gaming Support believe this sign is unique in Europe, and maybe even the world; no other KKC sign currently has a fully animated King Kong character to capture players' attention. This may help explain why the KKC slot bank at RCMP is performing so exceptionally well; because this slot bank is supported by an exceptional sign.
